8+

YEARS
EXPERIENCE

138+

CLIENTS ALL OVER
THE WORLD

12+

COUNTRIES WE
WORK WITH

6+

MILLION TONS OF
COAL SUPPLIES
PER YEAR

The major goal of our business is the Coal overseas supplying to our customers with the direct contract and price provided by Major Manufacturers.
Our partners widely represented by countries of Southeast Asia as well the Middle East.

We offer several grades of high calorific value coal with different specifications. We carefully analyze requirements of our customers in order to supply with suitable coals:

METALLURGICAL COAL (COKING COAL)

Used in the process of creating coke necessary for iron and steel-making. We supply Metallurgical Coal to vast industries across geographies.

ANTHRACITE

A hard, compact variety of coal that has a sub metallic lustre. It bears the highest carbon content and least impurities among all major types of coal.

THERMAL COAL

Also known as steam coal, is used for power and heat generation. We supply Thermal Coal ranging from 5000 NAR to 6500 NAR

PETROLEUM COKE

The solid non-volatile carbon residue left after the refinement of petroleum. It is used as a source of energy, or as a source of carbon for industrial usage.
